Contents

1 Introduction **1**

1.1 The nuisance unknowns in parameter estimation 1
1.2 The Bayesian approach: the bias-variance dilema 3
1.3 Noncircular nuisance unknowns 5
1.4 Self-noise in multivariate problems: interparameter interference. 6
1.5 Informative priors: estimation on track 7
1.6 Limiting asymptotic performance 8
1.7 Thesis Outline 9

2 Elements on Estimation Theory **13**

2.1 Classical vs. Bayesian Approach 15
2.2 MMSE and MVU Estimation 16
2.3 Maximum Likelihood Estimation 18
2.3.1 Decision Directed ML Estimation 19
2.3.2 Asymptotic properties 20
2.4 Linear Signal Model 23
2.4.1 Low-SNR Unconditional Maximum Likelihood 25
2.4.2 Conditional Maximum Likelihood (CML) 27
2.4.3 Gaussian Maximum Likelihood (GML) 28
2.5 Maximum Likelihood Implementation 29
2.5.1 ML-Based Closed-Loop Estimation 31
2.5.2 ML-based Tracking 35
2.6 Lower Bounds in Parameter Estimation 37
2.6.1 Deterministic Bounds based on the Cauchy-Schwarz Inequality 37
2.6.2 Bayesian Bounds based on the Cauchy-Schwarz Inequality 49
2.6.3 Bayesian Bounds based on the Kotelnikov's Inequality 52
2.A UML for polyphase alphabets 55
2.B Low-SNR UML results 56
2.C CML results 57
2.D GML asymptotic study 58

2.E Closed-loop estimation efficiency . . . 59
2.F Computation of $\Sigma_{\mathbf{sv}}(\theta)$ for the small-error bounds . . . 61
2.G MCRB, CCRB and UCRB derivation . . . 62

3 Optimal Second-Order Estimation **65**
3.1 Definitions and Notation . . . 67
3.2 Second-Order MMSE Estimator . . . 69
3.3 Second-Order Minimum Variance Estimator . . . 70
3.4 A Case Study: Frequency Estimation . . . 72
3.4.1 Bias Analysis . . . 73
3.4.2 MSE Performance . . . 75
3.5 Conclusions . . . 80
3.A Second-order estimation in noncircular transmissions . . . 81
3.B Deduction of matrix $\mathbf{Q}(\theta)$ . . . 82
3.C Fourth-order moments . . . 84
3.D Bayesian average in frequency estimation . . . 85
3.E Bias study in frequency estimation . . . 86

4 Optimal Second-Order Small-Error Estimation **89**
4.1 Small-Error Assumption . . . 91
4.2 Second-Order Minimum Variance Estimator . . . 92
4.3 Second-Order Identifiability . . . 93
4.4 Generalized Second-Order Constrained Estimators . . . 95
4.5 A Case Study: Frequency Estimation . . . 96
4.6 Conclusions . . . 104
4.A Small-error matrices . . . 105
4.B Proof of bias cancellation . . . 106

5 Quadratic Extended Kalman Filtering **107**
5.1 Signal Model . . . 109
5.2 Background and Notation . . . 110
5.3 Linearized Signal Model . . . 112
5.4 Quadratic Extended Kalman Filter (QEKF) . . . 112
5.4.1 Another QEKF derivation . . . 113
5.4.2 Kalman gains recursion . . . 115
5.4.3 QEKF programming . . . 116
5.5 Simulations . . . 117
5.6 Conclusions . . . 121

6 Case Studies **123**

6.1 Non-Data-Aided Synchronization . . . 124
6.1.1 Overview . . . 124
6.1.2 Signal Model . . . 127
6.1.3 Open-Loop Timing Synchronization . . . 129
6.1.4 Closed-Loop Analysis and Optimization . . . 131
6.1.5 Numerical Results . . . 133
6.2 Carrier Phase Synchronization of Noncircular Modulations . . . 141
6.2.1 Signal Model . . . 142
6.2.2 NDA ML Estimation in Low-SNR Scenarios . . . 143
6.2.3 High-SNR Analysis: Self-noise . . . 145
6.2.4 Second-Order Optimal Estimation . . . 146
6.2.5 High SNR Study: Self-noise . . . 147
6.2.6 Numerical Results . . . 150
6.3 TOA Estimation in Multipath Scenarios . . . 152
6.3.1 Signal Model . . . 153
6.3.2 Optimal Second-Order NDA Estimator . . . 154
6.3.3 Optimal Second-Order DA Estimator . . . 156
6.3.4 Numerical Results . . . 157
6.4 Blind Channel Identification . . . 161
6.4.1 Signal Model . . . 162
6.4.2 Numerical Results . . . 163
6.5 Angle-of-Arrival (AoA) Tracking . . . 167
6.5.1 Signal Model . . . 168
6.5.2 Numerical Results . . . 170
6.A Computation of **Q** for carrier phase estimation . . . 175
6.B Asymptotic expressions for multiplicative channels . . . 176

7 Asymptotic Studies **177**
7.1 Introduction . . . 178
7.2 Low SNR Study . . . 180
7.3 High SNR Study . . . 181
7.3.1 (Gaussian) Unconditional Cramér-Rao Bound . . . 183
7.3.2 Gaussian Maximum Likelihood . . . 184
7.3.3 Best Quadratic Unbiased Estimator . . . 184
7.3.4 Large Error Estimators . . . 187
7.4 Large Sample Study . . . 188
7.4.1 (Gaussian) Unconditional Cramér-Rao Bound . . . 189
7.4.2 Gaussian Maximum Likelihood . . . 190
7.4.3 Best Quadratic Unbiased Estimator . . . 191

7.4.4 Second-Order Estimation in Digital Communications . . . 193
7.4.5 Second-Order Estimation in Array Signal Processing . . . 196
7.5 Simulations . . . 199
7.5.1 SNR asymptotic results for the BQUE and GML estimators . . . 199
7.5.2 SNR asymptotic results for the large-error estimators . . . 201
7.5.3 Large sample asymptotic results for the BQUE and GML estimators . . . 202
7.6 Conclusions . . . 209
7.A Low-SNR ML scoring implementation . . . 210
7.B High-SNR limit of $\mathbf{R}^{-1}(\theta)$ and $\widetilde{\mathbf{R}}^{-1}(\theta)$ . . . 211
7.C High-SNR limit of $\mathbf{Q}^{-1}(\theta)$ ($\mathbf{K}$ full-rank) . . . 213
7.D High-SNR limit of $\mathbf{Q}^{-1}(\theta)$ ($\mathbf{K}$ singular) . . . 215
7.E High-SNR results with $\mathbf{A}(\theta)$ singular . . . 217
7.F High-SNR UCRB . . . 219
7.G High-SNR UCRB variance floor . . . 220
7.H High-SNR study in feedforward second-order estimation . . . 221
7.I High-SNR MSE floor under the Gaussian assumption . . . 223
7.J Performance limits in second-order frequency estimation . . . 224
7.K Asymptotic study for $M \to \infty$ . . . 226
7.L Asymptotic study for $N_s \to \infty$ . . . 233

8 Conclusions and Topics for Future Research **237**
8.1 Further Research . . . 240

A Notation **245**

B Acronyms **249**
