

Contents

Chapter 1	
Introduction to silicon trackers at LHC	1
1.1 Radiation hard silicon trackers for the LHC	1
1.2 Cryogenic silicon microstrip detector modules for the LHC	4
1.3 LHC luminosity measurement	8
1.4 This work	10
Chapter 2	
Thermal and thermoelastic design of cryogenic silicon microstrip detector modules	13
2.1 Design of cryogenic detector modules	13
2.2 Choice of materials	16
2.3 Cooling system	25
2.4 Heat transfer measurements in microtubes	27
2.5 Alignment principles and design of the assembly tooling	31
Chapter 3	
Thermoelastic test results	39
3.1 Measurements of the thermal dilatation of filled epoxies	39
3.2 Results on integral thermal dilatation of filled epoxies between 4.2 K and 300 K	42
3.3 Measurements of the mechanical properties of filled epoxies	46
3.4 Comparison of the measured thermoelastic properties with theoretical models	48
3.5 Epoxy layer thickness	51
3.6 Summary of the thermoelastic properties measurements	52
Chapter 4	
Thermal test results on a module with a small sensor	53
4.1 Module thermal tests experimental setup	53
4.2 Enthalpy balance in two-phase flow	56
4.3 Pressure drop measurement	57
4.4 Results on the thermal behavior of the module	59
4.5 Comparison with thermal simulations	65
4.6 Discussion on the results	70
Chapter 5	
Electrical characterization of a cryogenic module	71
5.1 Electrical module description	71
5.2 Silicon sensor	73
5.3 Pitch adapter and support plate	75
5.4 Readout Electronics	77
5.5 Discussion on the results	80

Chapter 6	
Tests of edgeless silicon sensors	. 81
6.1 Introduction	. 81
6.2 Edgeless silicon pad sensors	. 82
6.3 Experimental method and equipment	. 84
6.4 Analysis of the data	. 88
6.5 Errors in determining the gap width between diodes	. 101
6.6 Insensitive area of the edgeless diode	. 105
Chapter 7	
Summary and conclusions	. 107
Appendix: Semiconductor physics	. 111
Bibliography	. 115
List of figures	. 119
List of tables	. 123
Index	. 125
Acknowledgements	. 127
