

**FIRM GROWTH, PERSISTENCE AND MULTIPLICITY OF
EQUILIBRIA:
AN ANALYSIS OF SPANISH MANUFACTURING AND
SERVICE INDUSTRIES**

PHD DISSERTATION

Mercedes Teruel Carrizosa

Supervisor: Dr. Agustí Segarra Blasco

Department of Economics

University Rovira i Virgili

July, 2006

Index

INDEX

CHAPTER 1. INTRODUCTION

- 1.1. Presentation**
- 1.2. Motivation and contributions**
- 1.3. Main conclusions**
- 1.4. Acknowledgements**

CHAPTER 2. A REVIEW OF THE LITERATURE OF THE FIRM GROWTH

- 2.1. Introduction**
- 2.2. Firm growth theory and the firm size**
 - 2.2.1. Definition of firm**
 - 2.2.2. Measure of firm size**
 - 2.2.3. Factors of firm growth**
 - 2.2.4. Different approaches to the firm growth**
- 2.3. Gibrat's Law**
 - 2.3.1. The evolution of Gibrat's Law**
 - 2.3.2. Empirical evidence**
 - 2.3.3. Spanish literature**
- 2.4. Summary and concluding remarks**

CHAPTER 3. DOES GIBRAT'S LAW HOLD FOR MANUFACTURES AND SERVICE INDUSTRIES?

- 3.1. Introduction**
- 3.2. A review of the literature**
 - 3.2.1. The firm growth and Gibrat's Law**
 - 3.2.2. The applied methodology**
 - 3.2.3. The empirical evidence**

Index

- 3.2.4. The literature related with service industries**
 - 3.3. Differences in the manufactures and service industries**
 - 3.4. The theoretical model**
 - 3.4.1. The Jovanovic's (1982) Passive Learning Model**
 - 3.4.2. Enlargements of the model**
 - 3.5. Data description**
 - 3.5.1. Data base**
 - 3.5.2. Data description**
 - 3.6. Methodology and empirical estimations**
 - 3.6.1. Econometric methodology**
 - 3.6.2. Specification of the growth equation**
 - 3.6.3. Estimation**
 - 3.7. Summary and concluding remarks**
-
- CHAPTER 4. THE PERSISTENCE OF FIRM GROWTH**
 - 4.1. Introduction**
 - 4.2. Empirical evidence**
 - 4.3. Chesher's model**
 - 4.4. Data description**
 - 4.4.1. Data base**
 - 4.4.2. Data description**
 - 4.5. Methodology and estimations**
 - 4.5.1. Econometric methodology**
 - 4.5.2. Estimation of the Chesher's equation**
 - 4.5.3. The learning process in the persistence of firm growth**
 - 4.5.4. The evolution of industries**
 - 4.5.5. What about the influence of past behaviour?**
 - 4.6. Summary and concluding remarks**

CHAPTER 5. THE FIRM GROWTH: IS THERE AN EQUILIBRIUM OR A MULTIPLICITY OF EQUILIBRIA?

5.1. Introduction

5.2. Literature

5.2.1. Different approaches to firm growth

5.2.2. Empirical evidence

5.2.3. Gaps in the literature

5.3. Estimating Gibrat's models

5.4. Methodology and empirical estimations

5.4.1. Data

5.4.2. Econometric methodology

5.4.3. Estimations

5.4.4. Results

5.5. A forecast of the future firm size

5.5.1. Estimation of the coefficients

5.5.2. Forecasted results

5.6. Summary and concluding remarks

CHAPTER 6. THE DETERMINANTS OF FIRM GROWTH

6.1. Introduction

6.2. Literature

6.2.1. Factors determining firm growth

6.2.2. Regional dimension

6.3. Locational externalities

6.3.1. The externalities

6.3.2. The locational externalities

6.4. Methodology and empirical estimations

6.4.1. Econometric methodology

6.4.2. Results

6.4.2.1. Determinants of firm growth

Index

6.4.2.2. The technological intensive sectors

6.5. Summary and concluding remarks

CHAPTER 7. CONCLUSIONS

7.1. Introduction

7.2. Conclusions

7.2.1. The theoretical literature

7.2.2. Gibrat's Law

7.2.3. Persistence of firm growth

7.2.4. The equilibrium of firm growth between industries

7.2.5. Determinants of firm growth

7.3. Future work
